DETAILED ACTION

1. The applicant has canceled claims 2,8,10,16. However, in the amendment of July 20, 2005, the applicant has not listed claim 13 nor indicate whether they intend to cancel claim 13. Appropriate correction is required.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 24-37 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The specification discloses that "Each of the pixels (R1-R5) of re-sampled video line 120 may be associated with a position relative to pixels in source video line 1 10. The relative positions are represented through absolute alpha values 112. In the illustrated embodiment, the absolute alpha values denote a distance from the nearest left pixel in source video line 1 10. Pixel R1 of re-sampled video line 120 is mapped part way between pixel P1 and pixel p2; accordingly, the absolute alpha value associated with pixel R1 is 0.5. Pixel 2 is mapped close to pixel P2 but far from pixel, P1. R2 is assigned an alpha value of 0.9. Step increases between absolute alpha values assigned for a next right pixel of re-sampled video line 120 is inversely proportional with an assigned scale to be performed. For example, with a scale of 2.5x, a step in alpha

value for every next pixel of re-sampled video line 120 is 1/2.5, or 0.4. Therefore, the absolute alpha value assigned to pixel 113 is 1.3; however, the "1" may be dropped to indicate pixel R3's relative distance to the nearest left pixel, P2. Therefore, the absolute alphavalue associated with pixel 14.3 is 0.3. The absolute alpha value associated with pixel 1k3 is 0.7. The absolute alpha value associated with pixel R5 is taken from pixel P3, and is 0.1. The next pixel of re-sampled video line 120, pixel R6 (not shown) would be taken from pixel 173 and would be 0.5, indicating that pixel R6 may be mapped between pixels P3 and R4."

However, claim 24 recites "wherein the absolute alpha values represents a position" without specifying what that position might be and thereby rendering the claim indefinite.

Allowable Subject Matter

4. Claims 1,3-7,9,11-15,17-23,38-42 are allowable over the prior art.
